Celebrate Singles day with Science

Take your fabulously single self
to our shop and get 20% OFF
with code

#sciencejewelry1824

Singles Day is quickly approaching and we want

to celebrate YOU!

With so many holidays centered around “the couple”, it might seem that the world has forgotten about the single lad or lady. But we haven’t! We know that being single comes with its own set of challenges, especially if you’re stuck in a lab. Pipetting endlessly.

So, we put together a list of top 10 scientifically valid reasons that “the single life” is in fact... pretty darn awesome. **Plus, believe it or not, you’ll be able to pair each reason with science jewelry that is now 20% OFF with our SINGLE20 code.** What a coincidence!

1. You seek out your own adventures, meticulously planning out every single [adrenaline](#) dump.
2. You create your own [oxytocin](#)-induced warm-fuzzies by hugging puppies, ponies, and other baby animals.
3. You know that chocolate makes your brain squirt out [dopamine](#). So you travel to Belgium and indulge in the really good stuff.
4. Your home is your *sanctum sanctorum* to reload and balance out your [serotonin](#) levels. Nothing is out of place and no one is in your space.
5. Your [heart](#) is whole and intact.
6. When things get tough, you have the option of rolling into a hypothetical tun, like a [tardigrade](#).
7. You can buy a [diamond necklace](#) for yourself.
8. You’re free to indulge in some [juniper](#) refreshments whenever, wherever, with whomever.
9. You might as well be [radioactive](#) with the glow of sufficient sleep and argument-free days.
10. No one asks you to throw your [cat skull](#) collection away because it “creeps them out”.

Well, what are you waiting for? Take your fabulously single self to our shop to splurge and **use the code SINGLE20 for 20% off.** We promise no one will enjoy it more than you.
